

Eagle Eye B-Lazr (Bird Lazer)

Eco-Friendly

Our Eagle Eye B-Lazr makes use of a Class 3R laser throwing red and green multiple light patterns to effectively repel pest birds. Engineered to cover areas up to 250-300m² this laser offers fantastic results for indoor areas chasing birds from their favorite perching and roosting spots.

- **Mix of Light Patterns:** Emits red and green lasers to create effective light patterns that deter birds.
- **Pre-Programmed On/Off Cycles:** Prevents birds from becoming used to the laser, with remote control setting intervals of 2, 4, 6, or 8 hours.
- **Durable Construction:** High quality aluminium housing ensures durability and longevity.
- **Easy Installation:** Comes with a mounting bracket and hardware for quick and secure setup.
- **Electricity is needed to drive the unit (client to install).**
- **Convenient Operation:** Includes a wireless remote control and a safety lockout key for secure and easy use.
- **Beam Control:** A manual shutter is used to control the distribution of the laser beam.

Specifications:

60° multi-pattern (Red and Green grade 3R laser).

50W power consumption.

Power output – 50-100mw **Are coverage 250 -300m²**
